Katsuya NAGAYAMA, et al.	:	Confirmation Number: 2568
Application No.: 10/520,619	:	Group Art Unit: 1731
Filed: January 10, 2005	:	Examiner: Not yet assigned
For: OPTICAL FIBER AND METHOD OF FABRICATING THE SAME	:	

REQUEST FOR CORRECTED FILING RECEIPT

Mail Stop OFR
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

Attached is a copy of the Filing Receipt received from the U.S. Patent and Trademark Office in the above-referenced application. It is noted that there is an **error in the number in individual claims**. Attached is a copy of the listing of claims and a copy of the application transmittal letter, which evidence that **the number of independent claims should read: 2**. It is requested that a corrected filing receipt be issued.

Respectfully submitted,

McDERMOTT WILL & EMERY LLP

Arthur J. Steiner
Registration No. 26,106

600 13th Street, N.W.
Washington, DC 20005-3096
Phone: 202.756.8000 AJS:sln
Facsimile: 202.756.8087
Date: January 19, 2006

**Please recognize our Customer No. 20277
as our correspondence address.**

CORRECTED FILING RECEIPT

OC000000017714074

Date Mailed: 12/22/2005

Receipt is acknowledged of this regular Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please mail to the Commissioner for Patents P.O. Box 1450 Alexandria Va 22313-1450. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

Applicant(s)

Title

Optical fiber and a method for manufacturing same

Preliminary Class

065

PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, <http://www.stopfakes.gov>. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4158).

**LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15**

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof

unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

Claims

1. A fabricating method of an optical fiber comprising the steps of:

5 a drawing step wherein an optical fiber preform having a core region and a cladding region formed on the periphery of said core region is heated and drawn with a drawing furnace into an optical fiber;

10 a heat treatment step wherein said optical fiber drawn with said drawing furnace is annealed by a heating furnace disposed downstream of said drawing furnace; and

15 a cooling step wherein said optical fiber annealed with said heating furnace is introduced with a temperature of fiber at 700°C or more into a cooling means disposed downstream of said heating furnace, and is cooled forcibly by said cooling means,

20 wherein in the course of said heat treatment step, said optical fiber is annealed on such annealing conditions that meet the requirements that the cooling speed of said optical fiber is to be 2000°C/second or less, and that the period of annealing time L/V_f is equal to or longer than the relaxation time τ , the length of said heating furnace being designated as L (m), the line speed of said optical fiber being
25 designated as V_f (m/second), the viscosity of said optical fiber at the entrance of said heating furnace

being designated as ηS (Pa-second), the tension of said optical fiber per a unit cross sectional area being designated as K (Pa), and the relaxation time thereof being defined as $\tau = \eta S / K$.

5 2. The fabricating method of the optical fiber according to claim 1, wherein, in said heat treatment step, said optical fiber is annealed by said heating furnace at a temperature of 800-1600°C.

10 3. The fabricating method of the optical fiber according to claim 1, wherein, in said heat treatment step, said optical fiber is annealed by said heating furnace at a temperature of 1100-1600°C.

15 4. The fabricating method of the optical fiber according to claim 1, wherein, in said cooling step, said optical fiber is introduced into said cooling means at a temperature of 700-1300°C.

20 5. The fabricating method of the optical fiber according to claim 1, wherein, in said drawing step, said heat treatment step and said cooling step, the line speed of said optical fiber is 300m/minute or more.

 6. The fabricating method of the optical fiber according to claim 1, wherein, in said heat treatment step, said optical fiber is annealed by said heating furnace for 0.03-0.8 seconds.

25 7. The fabricating method of the optical fiber according to claim 1, wherein said core region is doped

with Ge in such a quantity of dopant that the relative refractive-index difference [Ge] expressed by % with respect to pure SiO₂ satisfies a condition [Ge]≥0.3%.

5 8. The fabricating method of the optical fiber according to claim 1, wherein said cladding region has one or more cladding layers comprised of either of pure SiO₂, SiO₂ doped with Ge or SiO₂ doped with F respectively.

10 9. An optical fiber comprising a core region and a cladding region formed on the periphery of said core region, wherein said core region is doped with Ge in such a quantity of dopant that relative refractive-index difference [Ge] expressed by % with respect to pure SiO₂ satisfies a condition [Ge]≥0.3%,

15 the Rayleigh scattering coefficient A (dB/km·μm⁴) and the transmission loss α_{1.00} (dB/km) at a wavelength of 1.00μm are 97% or less of the reference value A₀ and α₀ respectively expressed by the following formulas:

$$A_0 = 0.85 + 0.29 [\text{Ge}]$$

20 α₀ = 0.86 + 0.29 [Ge], and

the difference in transmission loss Δα_{1.38} at a wavelength of 1.38μm between before and after hydrogen treatment is 0.15dB/km or less.

25 10. The optical fiber according to claim 9, wherein said cladding region has one or more cladding layers comprised of either of pure SiO₂, SiO₂ doped

with Ge or SiO_2 doped with F respectively.

OPTICAL FIBER AND METHOD OF FABRICATING THE SAMEAPPLICANTS FOR DO/EO/US
Katsuya NAGAYAMA, Keisei MORITA

Applicant herewith submits to the United States Designated/Elected Office (DO/EO/US) the following items and other information:

1. ☒ This is a **FIRST** submission of items concerning a filing under 35 U.S.C. 371.
2. ☐ This is a **SECOND** or **SUBSEQUENT** submission of items concerning a filing under 35 U.S.C. 371.
3. ☒ This express request to begin national examination procedures (35 U.S.C. 371(f)) at any time rather than delay examination until the expiration of the applicable time limit set in 35 U.S.C. 371(b) and PCT Articles 22 and 39(1).
4. ☐ A proper Demand for International Preliminary Examination was made by the 19th month from the earliest claimed priority date.
5. ☒ A copy of the International Application as filed (35 U.S.C. 371(c)(2))
 - a. ☒ is transmitted herewith (required only if not transmitted by the International Bureau).
 - b. ☐ has been transmitted by the International Bureau.
 - c. ☐ is not required, as the application was filed in the United States Receiving Office (RO/US)
6. ☐ A translation of the International Application into English (35 U.S.C. 371(c)(2)).
7. ☒ Amendments to the claims of the International Application under PCT Article 19 (35 U.S.C. 371(c)(3))
 - a. ☐ are transmitted herewith (required only if not transmitted by the International Bureau).
 - b. ☐ have been transmitted by the International Bureau.
 - c. ☐ have not been made; however, the time limit for making such amendment has NOT expired.
 - d. ☒ have not been made and will not be made.
8. ☐ A translation of the amendments to the claims under PCT Article 19 (35 U.S.C. 371(c)(3)).
9. ☒ An oath or declaration of the inventor(s) (35 U.S.C. 371(c)(4)).
10. ☐ A translation of the annexes to the International Preliminary Examination Report under PCT Article 36 (35 U.S.C. 371(c)(5)).

Items 11. to 16. below concern other document(s) or information included:

11. ☒ An Information Disclosure Statement under 37 CFR 1.97 and 1.98.
12. ☒ An assignment document for recording. A separate cover sheet in compliance with 37 CFR 3.28 and 3.31 is included.
13. ☐ A FIRST preliminary amendment.
☐ A SECOND or SUBSEQUENT preliminary amendment.
14. ☐ A substitute specification.
15. ☐ A change of power of attorney and/or address letter.
16. ☒ Other items or information.
 1. International Search Report prepared by JPO.
 2. Front page of Published International Application and copy of International Application as filed.
 3. PCT/IB/304, 308
